A place you cannot even imagine.  
Greetings, fellow people of the planet Earth!  
If you are suddenly interested in visiting Russia, but look for something way more special than those primitive trips to famous cities then this place is what may intrigue you.

Welcome to Korrov!

Korrov is a peaceful town in the Central Russia, where you can hide from concrete jungles and all the struggles stalking you in our busy modern world. Once a town of military glory and industrial center now it lives a slow life in harmony with nature, thanks to group of enthusiastic students, who launched the "greening" campaign back in 2030. You will discover this and many other truly exciting facts about Korrov's history (there are a lot) via the new feature that has been integrated in our software within the recent update.

Sights you must visit.

The lifestyle of Korrov's people may surprise tourists for it differs a lot from what most people are used to. And that would be a really fun thing to explore. Take the back vehicles within the town, for example due to huge bills for owning a car. But don't let that slow-paced surface trick you. The inner life of Korrov is much more interesting, but we do not want to spoil the experience.

*City of ancient wonders.*

Vladimir is a great place to visit - its rich history attracts tourists from all over the world. Modern technologies are harmonically integrated into Vladimir - we can see both magnificent medieval architecture and flying vehicles.

① Howies: Travelling system is very smart - buses no longer need drivers because of widespread high technologies. Flying cars are very convenient: they don't cause traffic anymore and their noises are catered due to high-quality software. They work on electricity, not fuel. People can get any food they want just by using 3D printers - they're a very common thing in almost every household.

② Working and studying: Both work and study are no longer a problem - you can access it from your personal computer, which is much more convenient than it was several decades ago. Freelance is very widespread: now people can spend more time on their interests and with their loved ones. Studying in universities and schools doesn't require personal attendance: students can learn the whole program at home.

③ Free time: Spending free time is a highly developed area: virtual reality can distract people from boredom of everyday life, but some prefer to entertain themselves by hanging out with their friends. They may visit history museums, <sup>and</sup> enjoy celebrations of folk holidays just as their ancestors used to.

All in all, Vladimir is full of contrasts, but it is charming and worth a visit.
